Introduction

Raised in Pécs, Hungary, in a football-driven environment, I developed a passion for the game at an early age and began playing at five. Alongside my studies in Business Informatics, I gained practical experience as a coach before transitioning into football analysis. Currently working as a data engineer, I aim to combine my background in informatics and coding with my passion for football in an analyst or scouting role. I am committed to continuous learning and professional development, with the goal of supporting player development and performance optimization through data-driven insights and scouting expertise.
