## DM In-Depth Report

### Player Summary:

Lamine Camara plays as midfielder. He is 22 years old and heights 1.73 m, physically with a very strong muscular constitution due to fitness and ethnic background, good velocity, body shape to protect the ball and go for duels able to cover a big part of the field running above average in a game. He is right footed in charge of free kicks and corners able to send good crosses from the sides of the field to the opponent's area. Good control of the ball with the chest and also left foot, which sometimes uses for short passes with accuracy. Dynamic, mobile, proactive looking for space to receive the ball for build up and initiative to press and tackle opponents even in parts out of his position as high on the field or backing up the side backs. Able to dribble long distances carrying the ball if space with good speed creating dangerous chances in favour for himself or combining with team mates. Good shot with right foot and great aerial competencies in duels as in defensive duties. High intensity playing style with right aggressiveness able to earn the ball cleanly without commit foul and protect the ball. Leadership skills, vocal and body language, communicative during the game.

### Movement to Receive:

B

### Movement to Receive - Description:

Proactive looking for the ball, always running around the field and communicative to find spaces. Good reflexes to receive and combine fast in tight spaces. Moving around the field horizontally, vertically and diagonally with good speed without the ball to find spaces to receive or for other team mates.

### Ball Retention:

B

### Ball Retention - Description:

Great body shape and physical constitution to keep the ball. Good skills to play in one or two touches combining with team mates to jump the opponent press.

### Pass Progression:

D

### Pass Progression - Description:

The low mark in this aspect is due to missing deep passes, although the decision making is good and lacks in the accuracy of the games observed in the clip, an aspect that could improve in other games and by experience.

### Dribble Progression:

B

### Dribble Progression - Description:

I only don't give an A because I think his speed could be faster, although good velocity and acceleration, imposing physical conditions and technical skills to progress with the ball long distances if space found to carry himself with the ball.

### Defending Runs in Behind:

A

### Defending Runs in Behind - Description:

He is clever and awake to cover spaces and helping team mates to recover the ball. Great physical conditions to track back in defense and tackle the runner if in possession of the ball or cover the mark.

### Shielding the #6 Zone:

A

### Shielding the #6 Zone - Description:

He is every where, we can see him in the centre or in the side backing up team mates in defense, even to press high and track position if opponent passed. From a tactical point of view, he could be more static and conservative protecting only the middle, but I take his mobility, initiative and proactivity to defend as something positive and that's why a high mark.

### Pressing the Ball Carrier:

B

### Pressing the Ball Carrier - Description:

Great physical conditions to tackle the carrier of the ball and win the ball cleanly without committing a foul.

### Defending Long Balls - Description:

Good positioning reading the game, strong with great aerial competencies as jumping and heading to clear the ball.

### Recommend to Sign?:

Yes

### Recommendation Description:

Camara meets all the criteria for what Newcastle is looking for. The current price is 35 millions euro and the contract ends summer 29.
